Picosecond Phenomena III: Proceedings of the Third International Conference on Picosecond Phenomena Garmisch-Partenkirchen, Fed. Rep. of Germany June 16-18, 1982 (Springer Series in Chemical Physics)

The third international conference devoted to picosecond phenomena was held June 16-18, 1982 in Garmisch-Partenkirchen, West Germany. Scientists from widely varying disciplines, physicists, chemists, biologists, and engineers came together to share their common interest in picosecond and subpicosecond processes. The meeting attracted approximately 250 scientists from numerous countries around the globe. More than .100 papers were concerned with the latest advances in the ex perimental and theoretical understanding of ultrafast phenomena. New dis coveries in femtosecond and picosecond pulse generation and new results in chemical dynamics, solid-state physics, and nonlinear optics were presented. The quality of the scientific reports, the enthusiasm of the participating scientists, as well as the magnificent surroundings of the Bavarian alps guaranteed a successful and pleasant conference. Numerous people have helped to make the conference a success. Special thanks are due to Carin von Oberkamp for dOing a superb job in implementing the meeting arrangements and to the program committee for the selection and organisation of the scientific presentations. The financial support of the Deutsche Forschungsgemeinschaft and of the Bayerische Staatsministerium fUr Unterricht und Kultur is gratefully ack nowledged.
