Earlier and Recent Aspects of Superconductivity: Lectures from the International School, Erice, Trapani, Sicily, July 4-16, 1989 (Springer Series in Solid-State Sciences)

This volume contains the lectures of "Earlier and Recent Aspects of Super conductivity", the 18th course of the International School of Materials Science and Technology, which was held at the Ettore Majorana Centre for Scientific Culture in Erice (Sicily), Italy, July 4-16, 1989. In the wake of the discovery of high-Tc oxides many international confer ences have been held on the subject, mainly intended for those already working in high-Tc research. Hence, the idea evolved of organizing a school dedicated to students and young scientists entering the field of superconductivity. The intention was to give a broad perspective of the field with its eight decades of research history and thus to link existing fields of knowledge and gain con tinuity. The new high-Tc cuprates were integrated, both historically and by subject, into the field of classical superconductivity, as well as into its newer branches of heavy-fermion, organic and chalcogenide superconductors. Even the organizers and the lecturers were surprised how many cross-links became apparent between the different branches of superconductivity. The lectures have been grouped into four parts, namely: - Fundamental properties of superconductors - Coherence-length-related properties - Electronic and magnetic properties - Theoretical models The number of applications from potential participants greatly exceeded the capacity of the facilities available. Ultimately, 100 students from 25 coun tries were selected to attend the course. The remarkable surroundings of the medieval town of Erice promoted a most stimulating but nevertheless relaxed atmosphere.

From reader reviews:

Arturo McDaniel:

Hey guys, do you wishes to finds a new book to read? May be the book with the headline Earlier and Recent Aspects of Superconductivity: Lectures from the International School, Erice, Trapani, Sicily, July 4-16, 1989 (Springer Series in Solid-State Sciences) suitable to you? The particular book was written by well known writer in this era. Often the book untitled Earlier and Recent Aspects of Superconductivity: Lectures from the International School, Erice, Trapani, Sicily, July 4-16, 1989 (Springer Series in Solid-State Sciences)is a single of several books that will everyone read now. This specific book was inspired a number of people in the world. When you read this guide you will enter the new dimension that you ever know before. The author explained their thought in the simple way, consequently all of people can easily to recognise the core of this book. Third, you can share your knowledge to some others. When you read this Earlier and Recent Aspects of Superconductivity: Lectures from the International School, Erice, Trapani, Sicily, July 4-16, 1989 (Springer Series in Solid-State Sciences), you could tells your family, friends and also soon about yours book. Your knowledge can inspire others, make them reading a guide.

April Robles:

The reason? Because this Earlier and Recent Aspects of Superconductivity: Lectures from the International School, Erice, Trapani, Sicily, July 4-16, 1989 (Springer Series in Solid-State Sciences) is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will surprise you with the secret it inside. Reading this book adjacent to it was fantastic author who have write the book in such remarkable way makes the content inside easier to understand, entertaining means but still convey the meaning completely.
