Industrial Design of Plastics Products

M. Joseph Gordon Jr.

Industrial Design of Plastics Products M. Joseph Gordon Jr.
Plastic product design relies on the same formulas and procedures used for the design of metal, yet plastics are unique building materials that require more in-depth knowledge to produce acceptable results. Plastic product designers must address specific quality control concerns in order to produce quality products at acceptable costs. Covering the many variables that impact the success of a plastics manufacturing program, Industrial Design of Plastics Products provides a complete resource for the efficient design and production of plastics.

Industrial Design of Plastics Products lists all steps necessary for effectively designing a plastic product for any industry. Physical properties and agency codes are listed, as well as full checklists for all areas of product design, contract, material selection, assembly techniques, manufacture, tooling, decoration, and shipping. The text also offers a list of examples with corresponding case studies to illustrate key concepts. Other features of this comprehensive volume include:

An easy-to-understand list of requirements for establishing a manufacturing program
A discussion of how material properties should be analyzed to achieve a product with the correct properties
A full set of design equations, including examples of how they should be used and considered when designing a plastic product

Successful plastic product design involves using the design team method to determine which material, mold, and process is best to manufacture a product. Industrial Design of Plastics Products provides a more detailed treatment in the basics of the subject than any other available resource, proving invaluable to design, chemical, and electrical engineers; materials scientists; and plastics manufacturers.

From reader reviews:

Gregory Proctor:

This book untitled Industrial Design of Plastics Products to be one of several books this best seller in this year, that is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this specific book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smartphone. So there is no reason to you to past this reserve from your list.

Mary West:

Exactly why? Because this Industrial Design of Plastics Products is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will distress you with the secret that inside. Reading this book adjacent to it was fantastic author who also write the book in such awesome way makes the content on the inside easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This amazing book will give you a lot of benefits than the other book have got such as help improving your skill and your critical thinking way. So , still want to hold up having that book? If I ended up you I will go to the reserve store hurriedly.

Dominick Tran:

Your reading sixth sense will not betray anyone, why because this Industrial Design of Plastics Products publication written by well-known writer we are excited for well how to make book that may be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and creating skill only for eliminate your hunger then you still hesitation Industrial Design of Plastics Products as good book not only by the cover but also from the content. This is one reserve that can break don't judge book by its handle, so do you still needing an additional sixth sense to pick this particular!? Oh come on your looking at sixth sense already said so why you have to listening to a different sixth sense.

Phyllis Granger:

What is your hobby? Have you heard that will question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important in addition to book as to be the thing. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is actually Industrial Design of Plastics Products.
