Colliders and Collider Physics at the Highest Energies: Muon Colliders at 10 TeV to 100 TeV: HEMC 99 Workshop (AIP Conference Proceedings / High Energy Physics)
This proceedings assesses long term experimental prospects for further examining the elementary particle building blocks, space-time structure and organizing principles of our natural universe by using many TeV muon colliders. Besides examining the accelerator technologies of very high energy muon colliders, a classification scheme for possible elementary particle discoveries is presented and some examples of possible discoveries are discussed.
