Market Dominance and Antitrust Policy M. A. Utton
This is a review and analysis of both the theoretical and policy problems associated with market dominance. Market dominance - encompassing single firm dominance, overt and tacit collusion mergers and vertical restraints - raises many complex analytical and policy issues. This book combines an analysis of the issues with a discussion of the leading cases in the UK, EU and US. It also deals with a number of controversial and unresolved questions including possible conflicts between trade and anti-trust policy, the foreign ownership of domestic assets, extra-territorial claims by some countries and the apparent inadequacy of anti-trust remedies.
