A New Kind of Science (ISBN:1579550088)
Stephan Wolfram, A New Kind of Science. "This long-awaited work from on of the wold's most respected scientists presents a series of dramati discoveries never before made public. Starting from a collection of simple computer experiments--illustrated in the book by striking computer graphics-- Stephen Wolfram shows how their unexpected results force a whole new way of looking at the operation of our universe. Wolfram uses his approach to tackle a remarkable array of fundamental problems in science, from the origins of apparent radomness in physical systems, to the development of complexity in biology, the ultimate scope and limitations of mathematics, the possibility of a truly fundamental theory of physics, the interplay between free will and determinism, and the character of intelligence in the universe. Written with exceptional clarity, and illustrated by nearly a thousand original pictures, this seminal book allows scientists and nonscientists alike to participate in what promises to be a major intellectual revoolution." (from inside front cover)
