Project Mercury Familiarization Manual Manned Satellite Capsule NASA
On October 4, 1957 at 10:28 Moscow time, a rocket carrying the world's first orbiting satellite roared into space, signaling a new era in human history and the beginning of the so-called "space race" - an epic rivalry pitting the technological know-how of the Soviet Union against that of the United States. Despite some highly publicized failures, the USA managed to answer the Russians with the successful launch of Explorer 1 in January of 1958. The next major milestone would be to put a human into orbit, a goal that defined the USA's Project Mercury. After a long series of test launches including a sub-orbital flight with the chimp Ham on board, Mercury astronaut Alan Shepard became the first American in space. On May 5, 1961 Shepard rode a Redstone rocket into space for a sub-orbital flight that lasted under 16 minutes. Nine months later, John Glenn's Friendship 7 capsule was launched into space atop an Atlas booster, and Glenn became the first American to orbit the earth. Glenn remained in space for nearly five hours and circled the planet three times. While these flights represented enormous achievements neither was an outright space race victory: cosmonaut Yuri Gagarin's orbital flight of April 12, 1961 earned him the title of first man in space, and first man to orbit the Earth. Designed by brilliant engineer Max Faget and a team at NASA, the Mercury space capsule represented an entirely new class of vehicle. Just large enough for a single astronaut, the joke about the cramped capsule was that it was "worn, not ridden". Despite reports otherwise, the capsule could be and was flown by astronauts who had attitude control thrusters at their disposal and a window for viewing. The capsule also boasted manual re-entry controls. Created by NASA and contractor McDonnell Aircraft, this Familiarization Manual explains all the systems aboard the Mercury space capsule including cabin controls, environmental and stabilization controls and systems, launch and re-entry sequence procedures, and navigation and communications equipment and procedures. Dating from June of 1962, it represents a late revision of documents created at the beginning of the Mercury program. Originally restricted, this manual has been declassified and is presented in its entirety, running nearly 400 pages.

From reader reviews:

Sammy McManus:

Now a day people who Living in the era just where everything reachable by connect to the internet and the resources within it can be true or not require people to be aware of each facts they get. How people have to be smart in acquiring any information nowadays? Of course the reply is reading a book. Reading a book can help persons out of this uncertainty Information especially this Project Mercury Familiarization Manual Manned Satellite Capsule book as this book offers you rich details and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you may already know.

Maria Davis:

Reading a e-book tends to be new life style in this era globalization. With reading you can get a lot of information that will give you benefit in your life. Having book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their own reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors in this world always try to improve their ability in writing, they also doing some research before they write on their book. One of them is this Project Mercury Familiarization Manual Manned Satellite Capsule.

Bill Dildy:

The reserve with title Project Mercury Familiarization Manual Manned Satellite Capsule includes a lot of information that you can study it. You can get a lot of benefit after read this book. That book exist new expertise the information that exist in this book represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This specific book will bring you throughout new era of the internationalization. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Robert Lewis:

Reserve is one of source of information. We can add our knowledge from it. Not only for students but additionally native or citizen have to have book to know the up-date information of year in order to year. As we know those books have many advantages. Beside all of us add our knowledge, could also bring us to around the world. By the book Project Mercury Familiarization Manual Manned Satellite Capsule we can take more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Just simply choose the best book that ideal with your aim. Don't become doubt to change your life by this book Project Mercury Familiarization Manual Manned Satellite Capsule. You can more pleasing than now.
