Climate Dynamics: Why Does Climate Vary?

Climate Dynamics: Why Does Climate Vary?
Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 189.

Climate Dynamics: Why Does Climate Vary? presents the major climate phenomena within the climate system to underscore the potency of dynamics in giving rise to climate change and variability. These phenomena include deep convection over the Indo-Pacific warm pool and its planetary-scale organization: the Madden-Julian Oscillation, the monsoons, the El Niño-Southern Oscillation, the Pacific Decadal Oscillation, and the low-frequency variability of extratropical circulations. The volume also has a chapter focusing on the discussion of the causes of the recent melting of Arctic sea ice and a chapter devoted to the discussion of the causes of recent changes in the frequency and intensity of tropical cyclones. On each topic, the basic material of climate dynamics is covered to aid the understanding of the forefront research, making the volume accessible to a broad spectrum of readers.

The volume highlights include

- Diabatic and nonlinear aspects of the El Niño-Southern Oscillation
- Causes of sea ice melting in the Arctic
- Impact of global warming on tropical cyclone activity
- Origins of the Pacific Decadal Oscillation
- Causes of climate variability of Asian monsoons

The volume will be of particular interest to graduate students and young researchers in atmospheric and oceanic sciences and related disciplines such as geology and geography. The book will also be a good read for those who have a more general interest in the Earth's climate and why it varies.

From reader reviews:

Donald Worsley:

Have you spare time for a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to typically the Mall. How about open or maybe read a book titled Climate Dynamics: Why Does Climate Vary?? Maybe it is to be best activity for you. You realize beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with their opinion or you have other opinion?

Doreen Wolf:

The book Climate Dynamics: Why Does Climate Vary? has a lot of knowledge on it. So when you check out this book you can get a lot of advantage. The book was written by the very famous author. This articles author makes some research ahead of write this book. This book very easy to read you will get the point easily after looking over this book.

Katrina Hering:

Playing with family within a park, coming to see the coastal world or hanging out with pals is thing that usually you might have done when you have spare time, in that case why you don't try point that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Climate Dynamics: Why Does Climate Vary?, it is possible to enjoy both. It is great combination right, you still would like to miss it? What kind of hang type is it? Oh can occur its mind hangout fellas. What? Still don't obtain it, oh come on its called reading friends.

Robin Lawrence:

Do you have something that you like such as book? The book lovers usually prefer to select book like comic, limited story and the biggest one is novel. Now, why not hoping Climate Dynamics: Why Does Climate Vary? that give your enjoyment preference will be satisfied by reading this book. Reading habit all over the world can be said as the way for people to know world better then how they react in the direction of the world. It can't be claimed constantly that reading routine only for the geeky individual but for all of you who wants to be success person. So , for every you who want to start looking at as your good habit, you may pick Climate Dynamics: Why Does Climate Vary? become your starter.
