Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing) Adrian J. Shepherd
About This Book This book is about training methods - in particular, fast second-order training methods - for multi-layer perceptrons (MLPs). MLPs (also known as feed-forward neural networks) are the most widely-used class of neural network. Over the past decade MLPs have achieved increasing popularity among scientists, engineers and other professionals as tools for tackling a wide variety of information processing tasks. In common with all neural networks, MLPsare trained (rather than programmed) to carryout the chosen information processing function. Unfortunately, the (traditional' method for trainingMLPs- the well-knownbackpropagation method - is notoriously slow and unreliable when applied to many prac tical tasks. The development of fast and reliable training algorithms for MLPsis one of the most important areas ofresearch within the entire field of neural computing. The main purpose of this book is to bring to a wider audience a range of alternative methods for training MLPs, methods which have proved orders of magnitude faster than backpropagation when applied to many training tasks. The book also addresses the well-known (local minima' problem, and explains ways in which fast training methods can be com bined with strategies for avoiding (or escaping from) local minima. All the methods described in this book have a strong theoretical foundation, drawing on such diverse mathematical fields as classical optimisation theory, homotopic theory and stochastic approximation theory.

From reader reviews:

Lisa Auyeung:

Have you spare time for just a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a walk, shopping, or went to the particular Mall. How about open as well as read a book entitled Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing)? Maybe it is to become best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have various other opinion?

Susan Scott:

The particular book Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing) has a lot associated with on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research previous to write this book. This specific book very easy to read you can obtain the point easily after looking over this book.

Shay Price:

This Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing) is great book for you because the content which is full of information for you who else always deal with world and still have to make decision every minute. This book reveal it details accurately using great arrange word or we can claim no rambling sentences inside it. So if you are read the item hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but tough core information with beautiful delivering sentences. Having Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing) in your hand like keeping the world in your arm, info in it is not ridiculous one. We can say that no book that offer you world throughout ten or fifteen second right but this book already do that. So , this is good reading book. Hey Mr. and Mrs. hectic do you still doubt which?

Steven Burley:

On this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become certainly one of it? It is just simple solution to have that. What you are related is just spending your time little but quite enough to possess a look at some books. One of several books in the top checklist in your reading list is usually Second-Order Methods for Neural Networks: Fast and Reliable Training Methods for Multi-Layer Perceptrons (Perspectives in Neural Computing). This book that is certainly qualified as The Hungry Hills can get you closer in getting precious person. By looking

up and review this reserve you can get many advantages.
