Sets, Logic and Categories (Springer Undergraduate Mathematics Series)

Peter J. Cameron

Sets, Logic and Categories (Springer Undergraduate Mathematics Series) Peter J. Cameron
Set theory, logic and category theory lie at the foundations of mathematics, and have a dramatic effect on the mathematics that we do, through the Axiom of Choice, Gödel's Theorem, and the Skolem Paradox. But they are also rich mathematical theories in their own right, contributing techniques and results to working mathematicians such as the Compactness Theorem and module categories. The book is aimed at those who know some mathematics and want to know more about its building blocks. Set theory is first treated naively an axiomatic treatment is given after the basics of first-order logic have been introduced. The discussion is su pported by a wide range of exercises. The final chapter touches on philosophical issues. The book is supported by a World Wibe Web site containing a variety of supplementary material.

From reader reviews:

Melvin Robinson:

Now a day people who Living in the era where everything reachable by connect with the internet and the resources in it can be true or not call for people to be aware of each facts they get. How people have to be smart in having any information nowadays? Of course the answer is reading a book. Reading through a book can help folks out of this uncertainty Information specifically this Sets, Logic and Categories (Springer Undergraduate Mathematics Series) book as this book offers you rich details and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you may already know.

Alma Brady:

Do you have something that you enjoy such as book? The book lovers usually prefer to decide on book like comic, brief story and the biggest you are novel. Now, why not trying Sets, Logic and Categories (Springer Undergraduate Mathematics Series) that give your satisfaction preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world much better then how they react when it comes to the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start reading through as your good habit, it is possible to pick Sets, Logic and Categories (Springer Undergraduate Mathematics Series) become your current starter.

Michael Spicer:

Are you kind of occupied person, only have 10 or 15 minute in your day to upgrading your mind ability or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your short period of time to read it because all of this time you only find reserve that need more time to be go through. Sets, Logic and Categories (Springer Undergraduate Mathematics Series) can be your answer given it can be read by a person who have those short free time problems.

Rachel Cady:

This Sets, Logic and Categories (Springer Undergraduate Mathematics Series) is brand new way for you who has attention to look for some information mainly because it relief your hunger associated with. Getting deeper you in it getting knowledge more you know or else you who still having little digest in reading this Sets, Logic and Categories (Springer Undergraduate Mathematics Series) can be the light food in your case because the information inside this specific book is easy to get simply by anyone. These books produce itself in the form which can be reachable by anyone, yes I mean in the e-book form. People who think that in reserve form make them feel drowsy even dizzy this publication is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss this! Just read this e-book sort for your better life and knowledge.
