.NET e-Business Architecture G. A. Sullivan

This book is written for architects and developers preparing to design and build enterprise-scale e-business applications using Microsoft's Visual Studio.NET and .NET Framework. It will guide technical architects and software developers through the design and development of a fully-featured e-commerce application, the gasTIX online ticketing system, using the .NET suite of technologies. Along the way, key concepts behind new .NET products such as C#, Visual Basic .NET, Visual C++ .NET, ASP.NET, ADO.NET, and Web Services are explained. The author team, consisting of several talented G.A. Sullivan consultants, has combined experience equaling tens of years in the trenches with the various releases of Microsoft Visual Studio.

The fully-functional live sample application built for the book can be seen at www.gasullivan.com
