Quality in the Constructed Project: A Guide for Owners, Designers, and Constructors American Society of Civil Engineers
The completely updated Second Edition of "ASCE Manual No. 73" provides information and recommendations on principles and procedures that are effective in enhancing the quality of constructed projects. The guide discusses the roles, responsibilities, requirements, and limits of authority of participants in the design and construction process, highlighting concepts and practices that are valuable to each in achieving project goals and objectives. It presents several key themes, including the value of clearly defining and assigning responsibilities, the importance of teamwork, the need for clear contractual provisions, strategies for good communication, the owner's selection process for other team members, the potential benefits associated with various project delivery systems, and procedures for managing design and construction. The guide is written primarily for the three principal project participants in a traditional design-bid-build (DBB) project: the owner, design professional, and constructor. It also highlights areas in which alternative forms of project delivery, such as design-build, may shift project responsibilities and risk to different participants. The chapters include: Owner's Role and Requirements; Project Delivery Systems; Project Team; Coordination and Communication; Selecting the Design Professional; Agreement for Professional Services; Alternative Studies and Project Impacts; Planning and Managing Design; Design Discipline Coordination; Guidelines for Design; Pre-Contract Planning for Construction; Construction Team; Procedures for Selecting the Constructor; Construction Contract; Planning and Managing Construction; Construction Contract Documentation and Submittals; Construction Contract Administration; Operation and Maintenance; Quality Assurance and Quality Control; Computers and Project Delivery; Peer Review; Risk, Liability, and Avoiding Conflict; Partnering; and Value Engineering.
