The Five Puberties: A 3S journal on children Bruce Dickson
Growing new eyes to see children afresh is the goal of this short booklet. It builds on the earlier Three Selves volumes--and--can be read alone. Children are viewed thru lenses seldom used: - Body, posture and stories the body tells, - What animals and plants tell us about children, - Five puberties lead to independent thinking. Finally, we survey progress made towards a functional typology of children's temperaments in Anthroposophy, MBTI and Katherine Benziger, providing some clarification and direction for fruitful study.
