Time and Petri Nets Louchka Popova-Zeugmann

At first glance the concepts of time and of Petri nets are quite contrary: while time determines the occurrences of events in a system, classic Petri nets consider their causal relationships and they represent events as concurrent systems. But if we take a closer look at how time and causality are intertwined we realize that there are many possible ways in which time and Petri nets interact. This book takes a closer look at three time-dependent Petri nets: Time Petri nets, Timed Petri nets, and Petri nets with time windows.

The author first explains classic Petri nets and their fundamental properties. Then the pivotal contribution of the book is the introduction of different algorithms that allow us to analyze time-dependent Petri nets. For Time Petri nets, the author presents an algorithm that proves the behavioral equivalence of a net where time is designed once with real and once with natural numbers, so we can reduce the state space and consider the integer states exclusively. For Timed Petri nets, the author introduces two time-dependent state equations, providing a sufficient condition for the non-reachability of states, and she also defines a local transformation for converting these nets into Time Petri nets. Finally, she shows that Petri nets with time-windows have the ability to realize every transition sequence fired in the net omitting time restrictions.

These classes of time-dependent Petri nets show that time alone does not change the power of a Petri net, in fact time may or may not be used to force firing. For Time Petri nets and Timed Petri nets we can say that they are Turing-powerful, and thus more powerful than classic Petri nets, because there is a compulsion to fire at some point in time. By contrast, Petri nets with time-windows have no compulsion to fire, their expressiveness power is less than that of Turing-machines.

This book derives from advanced lectures, and the text is supported throughout with examples and exercises. It is suitable for graduate courses in computer science, mathematics, engineering, and related disciplines, and as a reference for researchers.

From reader reviews:

Mary Rohan:

The book Time and Petri Nets gives you the sense of being enjoy for your spare time. You can use to make your capable a lot more increase. Book can for being your best friend when you getting strain or having big problem with the subject. If you can make reading through a book Time and Petri Nets being your habit, you can get much more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like wide open and read a reserve Time and Petri Nets. Kinds of book are several. It means that, science publication or encyclopedia or other people. So , how do you think about this reserve?

Jose Wilson:

Spent a free a chance to be fun activity to perform! A lot of people spent their leisure time with their family, or all their friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book is usually option to fill your totally free time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try look for book, may be the publication untitled Time and Petri Nets can be great book to read. May be it can be best activity to you.

Clara Demoss:

Playing with family in a very park, coming to see the sea world or hanging out with friends is thing that usually you might have done when you have spare time, then why you don't try factor that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Time and Petri Nets, you are able to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't get it, oh come on its referred to as reading friends.

Owen Neri:

Reading a book to be new life style in this year; every people loves to learn a book. When you learn a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself look for a fiction books, this kind of us novel, comics, along with soon. The Time and Petri Nets provide you with a new experience in studying a book.
