Machine Learning: Algorithms and Applications Mohssen Mohammed, Muhammad Badruddin Khan, Eihab Bashier Mohammed Bashier

Machine learning, one of the top emerging sciences, has an extremely broad range of applications. However, many books on the subject provide only a theoretical approach, making it difficult for a newcomer to grasp the subject material. This book provides a more practical approach by explaining the concepts of machine learning algorithms and describing the areas of application for each algorithm, using simple practical examples to demonstrate each algorithm and showing how different issues related to these algorithms are applied.

From reader reviews:

Casey Larsen:

What do you think of book? It is just for students because they are still students or the idea for all people in the world, exactly what the best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't need do that. You must know how great and also important the book Machine Learning: Algorithms and Applications. All type of book are you able to see on many sources. You can look for the internet sources or other social media.

Stephen Hilton:

Your reading 6th sense will not betray you, why because this Machine Learning: Algorithms and Applications publication written by well-known writer we are excited for well how to make book that may be understand by anyone who else read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your personal hunger then you still question Machine Learning: Algorithms and Applications as good book not merely by the cover but also by the content. This is one reserve that can break don't evaluate book by its include, so do you still needing another sixth sense to pick this!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Martha McKee:

Are you kind of stressful person, only have 10 or maybe 15 minute in your day time to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your small amount of time to read it because this all time you only find reserve that need more time to be examine. Machine Learning: Algorithms and Applications can be your answer as it can be read by anyone who have those short time problems.
