Bilash Kanti Bala, Fatimah Mohamed Arshad, Kusairi Mohd Noh

System Dynamics: Modelling and Simulation (Springer Texts in Business and Economics) Bilash Kanti Bala, Fatimah Mohamed Arshad, Kusairi Mohd Noh
This book covers the broad spectrum of system dynamics methodologies for the modelling and simulation of complex systems: systems thinking, causal diagrams, systems structure of stock and flow diagrams, parameter estimation and tests for confidence building in system dynamics models. It includes a comprehensive review of model validation and policy design and provides a practical presentation of system dynamics modelling. It also offers numerous worked-out examples and case studies in diverse fields using STELLA and VENSIM. The system dynamics methodologies presented here can be applied to nearly all areas of research and planning, and the simulations provided make the complicated issues more easily understandable. *System Dynamics: Modelling and Simulation* is an essential system dynamics and systems engineering textbook for undergraduate and graduate courses. It also offers an excellent reference guide for managers in industry and policy planners who wish to use modelling and simulation to manage complex systems more effectively, as well as researchers in the fields of modelling and simulation-based systems thinking.

From reader reviews:

John Tibbs:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each book has different aim or perhaps goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They may be reading whatever they acquire because their hobby will be reading a book. Consider the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or even exercise. Well, probably you should have this System Dynamics: Modelling and Simulation (Springer Texts in Business and Economics).

John Newton:

Have you spare time for the day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the actual Mall. How about open or maybe read a book eligible System Dynamics: Modelling and Simulation (Springer Texts in Business and Economics)? Maybe it is for being best activity for you. You realize beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with their opinion or you have other opinion?

Hope Giles:

Now a day folks who Living in the era where everything reachable by match the internet and the resources in it can be true or not require people to be aware of each info they get. How a lot more to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Reading through a book can help persons out of this uncertainty Information specifically this System Dynamics: Modelling and Simulation (Springer Texts in Business and Economics) book since this book offers you rich facts and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Mark Whitten:

A lot of people always spent all their free time to vacation or even go to the outside with them household or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you would like try to find a new activity here is look different you can read the book. It is really fun for yourself. If you enjoy the book that you simply read you can spent all day every day to reading a e-book. The book System Dynamics: Modelling and Simulation (Springer Texts in Business and Economics) it is extremely good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. If you did not have enough space to create this book you can buy the actual e-book. You can m0ore effortlessly to read this book from your smart phone. The price is not to fund but this book provides high quality.
