Rhino Rescue: Changing the Future for Endangered Wildlife (Firefly Animal Rescue) Garry Hamilton

"Whenever you touch a rhino, you think you're touching a dinosaur."
- from the introduction

A rhinoceros is a powerful beast weighing 3 tons or more and wielding a deadly horn up to five feet long. Ruthlessly slaughtered for centuries, rhinos are suddenly one of conservation's great success stories as populations of white rhinos and black rhinos recover. Even so, rhinos are still at risk: Javan and Sumatran rhinos are close to extinction and the world rhino population is still less than it was just 30 years ago.

Rhino Rescue profiles people around the world who are helping rhinos, including:

- Terri Roth of the Cincinnati Zoo, who guided the successful breeding of a rare Sumatran rhino in captivity for the first time in 112 years
- Esmond Martin, who helped stop the use of rhino horn in ceremonial daggers, a change that saved thousands of rhinos
- Rob Brett, who risks his life relocating rhinos, a key to successful conservation
- Bibhab Talukdar, a conservationist from India, who does almost anything to protect the Indian rhino, including going undercover to nab poachers.

Illustrated with 50 spectacular color photographs, **Rhino Rescue** also surveys the biological issues in and challenges of preserving a future for endangered wildlife.

About the *Firefly Animal Rescue* series:

The *Firefly Animal Rescue* identifies endangered and threatened species and what is being done to protect them. Combining lively, accessible text and stunning color photographs, each book provides a detailed overview of the species, describing its characteristics, behavior, habits, physiology and more.

"These attractive books are a call to action... fascinating readable accounts."
- School Library Journal

"Succinct introductions to the science and practice of wildlife conservation... written in accessible, lively language."
- Booklist
