World Hemispheres [Tubed] (National Geographic Reference Map) National Geographic Maps - Reference

During the 1930's and 1940's, several National Geographic world maps were designed using a projection that separated the eastern and western hemispheres. National Geographic has brought back this classic view of the world with updated, modern cartography and an elegant earth-tone color palette. This new, yet fashionably retro, world map is the World Hemispheres.

The map is packaged in a two inch diamater clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information.

- *Map Scale = 1:37,330,000*
- *Sheet Size = 42.75" x 24.5"*
